

EU Toy Safety Regulation (EU) 2025/2509 (TSR)

On 12 December 2025, the EU published the Toy Safety Regulation (EU) 2025/2509 (TSR). The regulation entered into force on 1 January 2026 and will apply from 1 August 2030 onwards. Unlike the current Toy Safety Directive 2009/48/EC (TSD), the TSR and its amendments will apply directly to all EU Member States.

Core points related to chemical requirements in the TSR

- ① The limit values for the 19 heavy metals are consistent with the latest version of EN 71-3.
- ② The following substances shall not be intentionally added to toys, toy components, or micro-structurally distinct parts of toys:
 - substances classified in Part 3 of Annex VI to Regulation (EC) No 1272/2008 in any of the following categories:

Hazard class	Category
Carcinogenicity, germ cell mutagenicity or reproductive toxicity (CMR)	Category 1A, 1B or 2
Endocrine disruption	For human health category 1 or 2
Specific target organ toxicity, either in single exposure or in repeated exposure	Category 1
Respiratory sensitisation	Category 1
Skin sensitisation	Category 1A

- per- and polyfluoroalkyl substances (PFAS)
 - 10 bisphenols
- ③ Toys shall not be biocidal products or treated items under the EU Biocidal Products Regulation ((EU) 528/2012).
 - ④ N-nitrosamines and N-nitrosatable substances and their limit values.
 - ⑤ 11 chemicals with extended scope of application and their limit values, including migration limits for 4 monomer substances.
 - ⑥ 59 fragrance allergens and their limit values.

We have deep expertise in the field of global toy regulatory compliance, backed by solid R&D capabilities and comprehensive laboratory testing capacities. We provide one-stop technical support to help our customers successfully bring their products to the international toy market.

Successful Conclusion of Three Major 2026 Industry Exhibitions

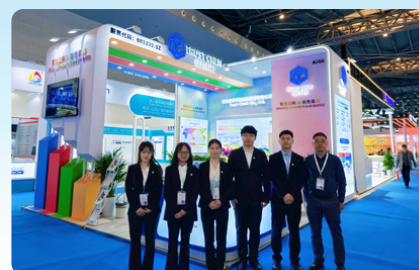

In April and May 2026, Trust Chem participated in three major industry exhibitions: CHINA INTERDYE, CHINAPLAS and ACS, all concluded successfully.

Our booth attracted continuous attention throughout the events. We presented our full range of organic pigments and dyes, together with our professional technical services. Our sales and technical teams connected with industry partners in in-depth exchanges, securing multiple cooperation intentions and gaining positive recognition from visitors.

These exhibitions served as an ideal platform for brand presentation and business cooperation. Moving forward, Trust Chem will follow up on all potential collaborations, keep optimizing products and services, and accelerate the implementation of new partnerships.

Driven by continuous innovation, we will cooperate with global partners to pursue steady and high-quality development across the industry.
