# Pigment Red 2 TCR00204 – Ultra-Low PCB Grade for W/B Ink Applications

TCR00204 is a specially designed yellow-shade Naphthol AS red pigment designed for water-based ink applications. It offers excellent resistance to both acid and alkali.

With its outstanding compliance profile and barium-free characteristic, TCR00204 is suitable for a wide variety of ink systems.

## Core Compliance Advantages

- PCB <10ppm (Test Method ISO 787-28:2019)
- PAA <500ppm
- Naphthol AS <1%
- Rosin Free
- EU REACH Compliant

## One-stop Compliance Solution
